

Oilseeds: World Markets and Trade

Indonesia Soybean Meal Imports Grow on Increased Feed Demand

Indonesia imports of soybean meal are raised 200,000 metric tons (tons) this month, bringing the total to 6.2 million tons in MY 2024/25 (Oct-Sep), a 1.1-million-ton increase from 2023/24.

Indonesia's poultry and aquaculture industries use soybean meal as a major feed input, and as domestic protein demand increases, imports of soybean meal are forecast to rise concurrently (see [Post report¹](#)). In 2023/24, imports of soybean meal hit a low as Indonesia's feed industry grappled with culling mandates and high input costs that lowered demand.

The United States is Indonesia's top supplier of soybeans with nearly 90 percent market share in 2023/24, but captured only 3 percent of Indonesia's soybean meal market in the same year as the third largest supplier after Brazil and Argentina. Indonesia imports whole soybeans for food use in tempeh and tofu production, while soybean meal imports largely go towards the feed industry, making imports unsuitable substitutes for one another.

Until 2022/23, Argentina was consistently Indonesia's top supplier of soybean meal. In that year, Argentina experienced a drought that decreased soybean meal production and exports by over 20 percent each. During that same period, Brazil increased soybean meal production, resulting in increased exports of nearly 30 percent between 2020/21 and 2022/23. Since 2022/23, Brazil maintained its dominance as Indonesia's largest supplier of soybean meal, accounting for nearly 80 percent of imports in 2023/24.

¹GAIN Report: Oilseeds and Products Update, Country: Indonesia

Global Soymeal Export Growth to Slow in 2025/26 after Two Big Years

Global soybean meal exports are forecast to rise in 2025/26 as meal consumption continues to grow, incentivized by lower soybean meal prices relative to other feed ingredients. While growth is expected to slow compared to double-digit rates in 2023/24 and 2024/25, this would mark the third consecutive year of record soybean meal exports. USDA currently forecasts world soybean meal exports in 2025/26 at 82.0 million tons, a 1 percent increase from 2024/25, but a continuation of a growth trend that has led to exports increasing by nearly a quarter in only 3 years. Lower soybean meal prices were caused by large global soybean supplies and biofuel policies in Brazil and the United States, which increased fat and oil feedstock demand, incentivizing crushing expansion and raising exportable supplies of soybean meal.

Rising global soybean meal supplies beginning in 2023/24 have exerted downward pressure on prices. The average FOB prices have declined from around \$550/ton for major exporters in November 2023 to around \$300/ton in July 2025. These favorable prices, as well as strong growth in global feed demand, have led to significant import growth for many countries during the 2023/24 to 2025/26 period, when compared to the previous 3-year average. Global soybean meal imports are expected to be nearly 10 million tons higher in this period, driven by import growth in markets including Iran, the European Union, Vietnam, and Mexico.

OVERVIEW 2025/26

The global oilseeds production forecast is lowered this month on lower U.S. soybean, Ukraine and EU sunflowerseed, and U.S. and Sudan cottonseed. Global oilseeds trade is down slightly as decreased U.S. soybean and Ukraine rapeseed is not offset by increased Argentina soybeans. Global oilseeds crush is down on decreased EU and Ukraine sunflowerseed and U.S. and Uzbekistan cottonseed crush, largely offsetting increased rapeseed crush from the EU. Global oilseeds ending stocks are forecast lower on decreased U.S. and Argentina soybean stocks not offset by raised EU rapeseed. Global oilseed meal trade is unchanged with higher India rapeseed meal offsetting a decline in Ukraine sunflowerseed meal exports. Global vegetable oil trade is lowered on decreased Ukraine sunflowerseed oil exports.

The projected U.S. season-average farm price for soybeans is unchanged at \$10.10 per bushel.

OVERVIEW 2024/25

Global oilseeds production is raised this month on higher soybean production in Argentina and Uruguay and peanut production in Sudan, greatly offsetting decreased cottonseed production across Africa. Global oilseeds trade is raised on higher Uruguay and U.S. soybean exports, offsetting minor decreases in Ukraine rapeseed and sunflowerseed. Global oilseeds crush is raised on higher Argentina, Egypt, U.S., and Turkey soybean crush. Global oilseeds ending stocks are raised on increased EU rapeseed and Argentina soybean stocks, offsetting decreased U.S. soybeans stocks. Global oilseed meal trade is up on higher Brazil, U.S., and Argentina soybean meal largely offsetting a decline in EU sunflowerseed and Malaysia palm kernel meal. Global vegetable oil trade is unchanged as lower Papua New Guinea palm oil exports offset increased exports of Argentina, China, and Turkey soybean oil.

The projected U.S. season-average farm price for soybeans is unchanged at \$10.00 per bushel.

EXPORT PRICES

Since the last WASDE report, soybean export prices remain largely unchanged aside from the United States. U.S. soybean export prices have trended downward away from Argentina and Brazil over the past month as crop condition reports confirmed expectations of a large crop combined with lagging export sales. In contrast, soybean meal export prices appreciated slightly over the month following a multi-month decline that resulted in record lows during July. U.S. soybean meal ended the month rising above \$300/ton on strong export sales.

Soybean oil export prices from Brazil and Argentina increased over the past month on strong demand from importers. U.S. soybean oil export prices remain largely unchanged and still hold a substantial premium over alternative origins due to strong domestic demand for biofuels. Ukraine sunflowerseed oil strengthened as production outlook declined. EU rapeseed oil export prices declined over the month as harvest continues across Europe, though prices remain elevated amid presently low supplies. Palm oil remains the world's discount oil with some month-to-month appreciation as import demand accelerates.

ENDNOTES

REGION DEFINITIONS

North America: Canada, Mexico, the United States

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama

Caribbean: Cuba, Dominican Republic, Haiti, Jamaica, Trinidad and Tobago

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, and Sweden. Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) was complete, including trade between both entities. Starting in May 2021 with the release of 2021/22 data, grain PSDs reflect EU27 (shown in the PSD system as “European Union”) and UK separately. Beginning with the release of 2021/22 data, historical data for both EU27 and the UK are provided for 5 years (2016/17 through 2020/21).

Other Europe: Albania, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, North Macedonia, Montenegro, Norway, Serbia, Switzerland, United Kingdom

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan

Middle East: Afghanistan, Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia

Sub-Saharan Africa: all African countries except North Africa

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan

South Asia: Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam

Oceania: Australia, Fiji, New Zealand, Papua New Guinea

OTHER NOTES

Marketing Years (MY): MY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's MY for that commodity (2022/23 starts in 2022); except for oilseeds in certain Southern Hemisphere countries, where the second year begins the MY (2022/23 starts in 2023). For a complete list of local marketing years, please see the FAS website (<https://apps.fas.usda.gov/psdonline/>): go to Reports, Reference Data, and then Data Availability.

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years.
